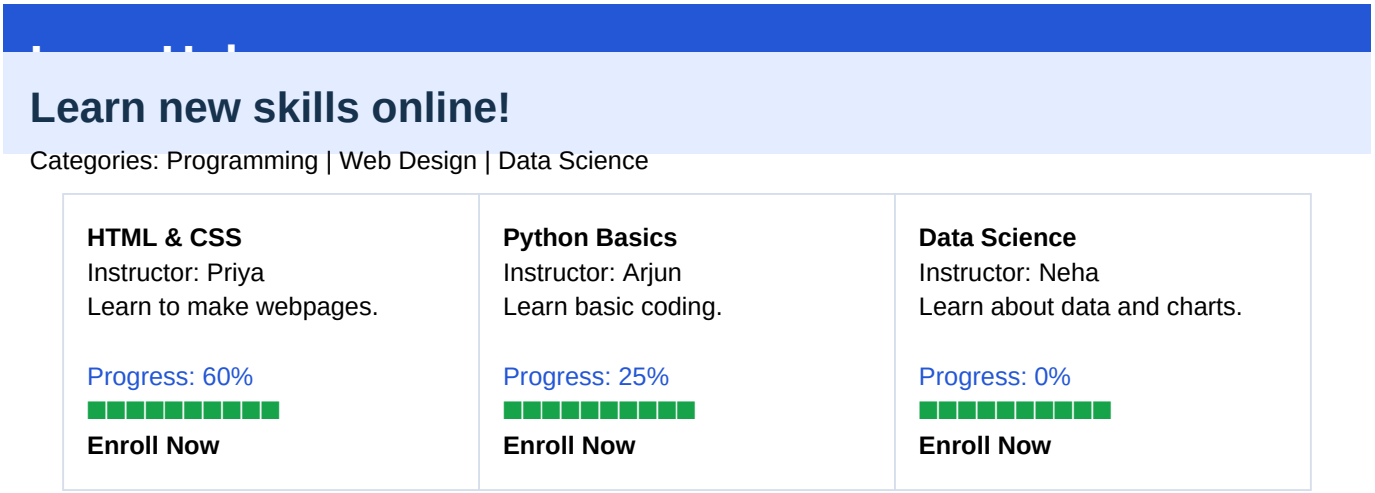
Simple Online Learning Website

Beginner project • One HTML file • Simple HTML and CSS

1. Website preview



2. Simple webpage code

Copy this code into Notepad and save the file as **index.html**.

```
<!DOCTYPE html>
<html>
<head>
  <title>LearnHub</title>
  <style>
    body {
      font-family: Arial;
      background: #f2f6ff;
      margin: 20px;
    }
    header {
      background: navy;
      color: white;
      padding: 15px;
      text-align: center;
    }
    .courses {
      display: flex;
      gap: 15px;
      flex-wrap: wrap;
    }
    .card {
      background: white;
      padding: 15px;
      border: 1px solid lightgray;
      width: 200px;
    }
    button {
      background: blue;
      color: white;
      padding: 8px;
      border: none;
    }
    .bar {
      background: lightgray;
      height: 10px;
    }
    .green {
      background: green;
      height: 10px;
      width: 60%;
    }
    @media (max-width: 600px) {
      .courses { flex-direction: column; }
    }
```

```
  </style>
</head>
<body>
```

2. Simple webpage code (continued)

```
  <header>
    <h1>LearnHub</h1>
    <p>Learn new skills online!</p>
  </header>

  <h2>Course Categories</h2>
  <p>Programming | Web Design | Data Science</p>

  <h2>Popular Courses</h2>
  <div class="courses">
    <div class="card">
      <h3>HTML and CSS</h3>
      <p>Instructor: Priya</p>
      <p>Learn to make webpages.</p>
      <p>Progress: 60%</p>
      <div class="bar"><div class="green"></div></div>
      <br><button>Enroll Now</button>
    </div>

    <div class="card">
      <h3>Python Basics</h3>
      <p>Instructor: Arjun</p>
      <p>Learn basic coding.</p>
      <p>Progress: 25%</p>
      <div class="bar"><div class="green"
        style="width:25%"></div></div>
      <br><button>Enroll Now</button>
    </div>

    <div class="card">
      <h3>Data Science</h3>
      <p>Instructor: Neha</p>
      <p>Learn about data and charts.</p>
      <p>Progress: 0%</p>
      <div class="bar"><div class="green"
        style="width:0%"></div></div>
      <br><button>Enroll Now</button>
    </div>
  </div>
</body>
</html>
```

3. How to run it

1. Open Notepad on your computer.

2. Copy all the code from the previous pages.

3. Paste it into Notepad.

4. Save the file as **index.html**. Select “All Files” if Notepad asks for a file type.

5. Double-click index.html to open your webpage in Chrome or Edge.

6. To change a course, edit its title, instructor, or progress percentage in the code.

Note: This is a simple demo. The buttons are examples and do not enroll students in a real course.
